THE GROUND UP PROJECT

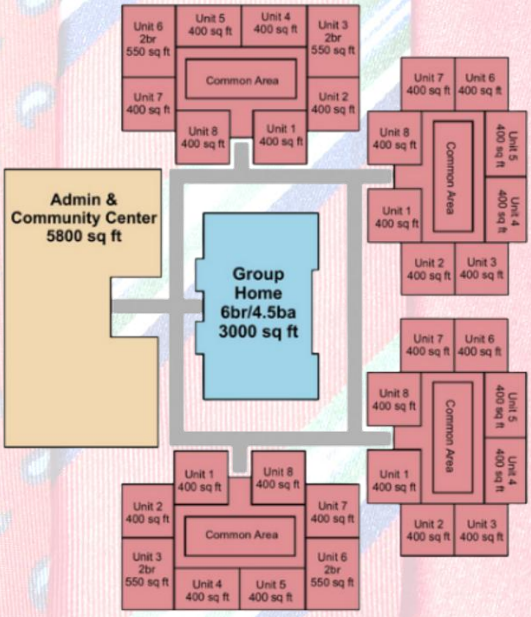
"A Respite And Residential Solution...Because Autism Doesn't End At 18"

The Ground Up Project, Inc ("GUP") was established in 2023 by a group of parents of children with autism. GUP founders recognized a lack of opportunities in Northwest Florida for individuals with autism to continue to achieve success and independence as adults.

Mission and Vision

GUP's vision includes, but is not limited to, establishing a residential community consisting of both group homes and independent living scenarios with 24/7 support staff and security. The residents will have access to a community center that allows them to experience meaningful social interactions and participate in group activities in a safe environment. GUP's ultimate goal is to create a space where each resident has every support system in place required to allow them success in leading a healthy and happy independent adult life.

On September 15, 2025, GUP opened an adult day training program, called The Resting Tree, that is currently serving individuals (ages 16 – 55) with autism and other intellectual and developmental delays. This program provides opportunities to improve life skills, engage in social interactions with peers, and participate in art, music and physical activities.



FUNDRAISING GOALS

GUP's current fundraising efforts are aimed at the acquisition of land and construction of this facility. Your support in this endeavor is greatly appreciated!
